

PV Modules Registration - Instructions

WHICH KIND OF PV MODULES SHOULD BE REGISTERED?

According to the Italian law, the following categories of PV Modules should be registered and guaranteed in the Trust database of an Italian Collective Scheme approved by GSE:

- Old PV Modules installed in PV Plants that **receive feed-in tariffs under 4th Energy Law and connected to electricity after 30th June 2012**. For this category, concentrated solar power modules are not subjected to this obligation.
- Old PV Modules installed in PV Plants that receive feed-in tariffs under **5th Energy Law**. For this category, concentrated solar power modules and integrated PV systems with innovative features are not subjected to this obligation.
- PV Modules **put on the Italian market from 2nd February 2016 on** (Environmental Annex).

PV MODULES NOT FOUND: WHAT CAN I DO?

If the PV Modules you have researched don't belong to the categories mentioned above, it's correct that they are not registered.

If the PV Modules you have researched belong to one of the categories above but the system says they're not registered, we recommend carrying out some checks and actions:

- **The serial numbers in the .CSV file are correctly written?**
When serial numbers are written partially or there are missing spaces, symbols or letters, the research function won't be able to find your serial numbers.
- **Did you receive from the Producer a Membership Certificate issued by PV CYCLE Italia?**
The research function will show you only PV Modules registered at PV CYCLE Italia. PV Modules registered at other collective schemes or other PV CYCLE entities, cannot be found.
- **Contact the Producer to understand if the registration has been done and – when not done yet – the timing to complete the activity.**
After the PV Modules are sold by the Producer, the registration and guarantee of the PV Modules is not immediate, since the activity requires some technical time.

REGISTER AND GUARANTEE YOUR PV MODULES WITH PV CYCLE

According to the Italian law, the registration and guarantee of the PV Modules put on the Italian market is responsibility of the Producer (manufacturer, importer/reseller).

When the activity was never carried out and it's not possible to proceed through the Producer, it's possible to **join PV CYCLE Italia Consorzio to register and guarantee the PV Modules**.

Please contact us at italy@pvcycle.org for more information.
